Quadrogen Renewables Appoints Ashwani Kumar as Chief Executive Officer to Lead Full-Scope Renewable Energy Platform Across North America

Vancouver, BC – Aug 1, 2025 – Quadrogen is pleased to announce the appointment of **Ashwani Kumar** as **Chief Executive Officer**, signaling the company’s bold entry into the North American renewable energy market through the launch of Quadrogen Renewables - a new business platform focused on designing, constructing, owning, and operating high-performance clean energy infrastructure across the United States and Canada.

Mr. Kumar brings more than 30 years of global leadership experience in renewable energy, sustainability, and organics management. His career spans executive roles at leading clean-tech companies, including Vanguard Renewables, Anaergia Inc., and Harvest Power. Most recently, he served as Chief Operating Officer and Chief Engineer at Vanguard Renewables.

A licensed Professional Engineer with multiple international patents and publications, Mr. Kumar has delivered some of North America's most pioneering clean energy projects, including commercial-scale Renewable Natural Gas (RNG), and Combined Heat and Power (CHP) installations. His leadership consistently bridges deep technical insight with commercial execution, optimizing lifecycle performance and delivering measurable value across the asset portfolio.

“We are thrilled to welcome Ashwani Kumar as CEO at this pivotal moment,” said Alakh Prasad, President & CEO, Quadrogen Power Systems. “His track record in building and scaling integrated energy platforms will be instrumental as we launch Quadrogen Renewables and establish a full lifecycle presence in the multi-billion-dollar biogas and RNG markets.”

“Mr. Kumar brings a wealth of experience in stakeholder engagement in the biogas industry to accelerate project development and successful execution”, said Mr. Pinakin Patel, Chairman, Quadrogen Renewables.

Matt Lambrech, Board Member of Quadrogen Renewables said, “Mr. Kumar is uniquely qualified to create multiple value streams from currently wasted resources based on his vast knowledge of the biogas industry”.

Under Mr. Kumar’s leadership, Quadrogen Renewables will focus on the end-to-end development and long-term ownership of clean energy assets—delivering turnkey solutions that help decarbonize industry, agriculture, and communities.

About Quadrogen:

Quadrogen is a clean technology company specializing in advanced biogas clean-up and upgrading systems. Headquartered in Vancouver, BC, Quadrogen is expanding its footprint in North America

with the formation of **Quadrogen Renewables**, a platform that will design, construct, own, and operate renewable energy infrastructure for a low-carbon future.
